

THE LATEST TECHNOLOGY

SAVES YOU MONEY!

Fiber laser technology consumes less energy which equals cost savings on any sized production run

LT FIBER TUBE LASER

Efficiently processes highly reflective materials such as brass, copper and aluminum

Up to 6" max tube diameter
27' 11" max raw tube length
2 kW fiber source

Material Thickness:

Stainless Steel .200 (5mm)

Mild Steel .310 (8mm)

Aluminum .240 (6mm)

Brass .200 (5mm)

Copper .120 (3mm)

GHI MANUFACTURES SOLUTIONS

GHI's laser roster gets the job done!

Our facility also utilizes TRUMPF TruLaser and BLM LT8 laser cutters. Contact us today to find out which works best for your needs.
